Iris sample dataset

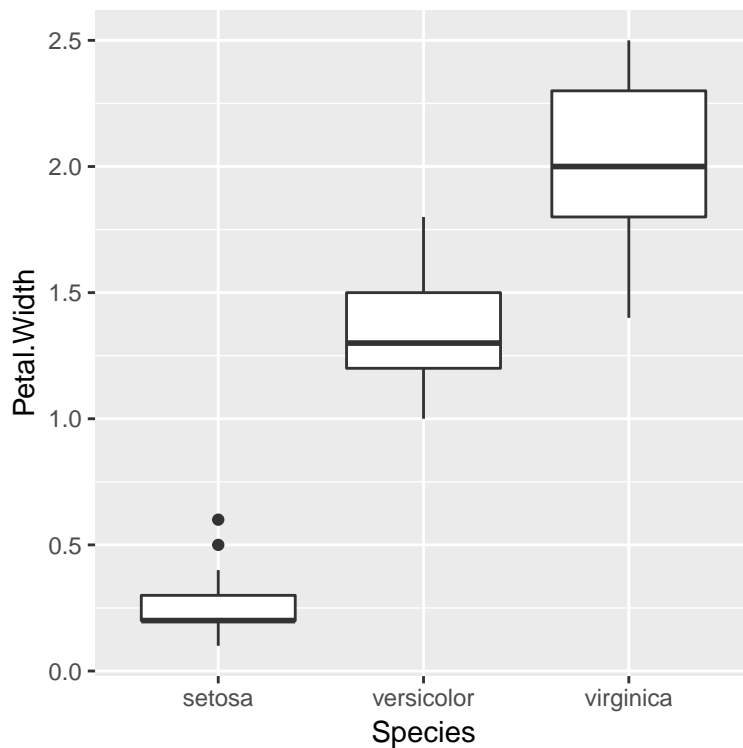

Figure 1: Boxplot of petal width for Iris species

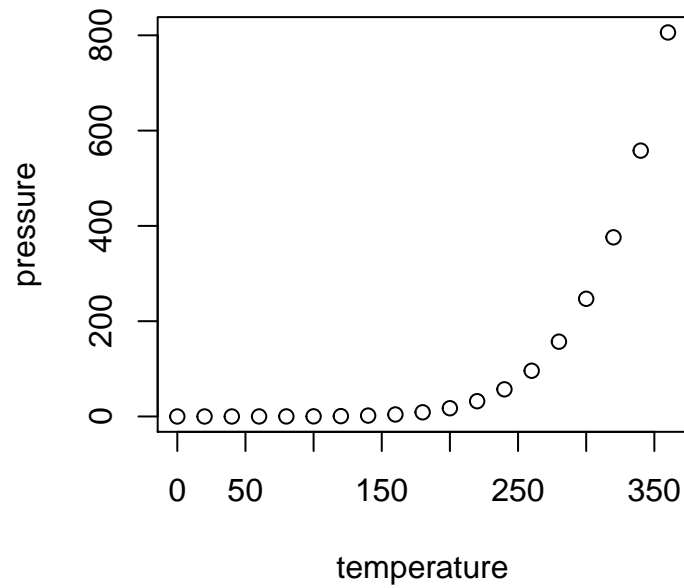

Figure 2: pressure

Species	Sepal.Length	Sepal.Width	Petal.Length	Petal.Width
setosa	5.006	3.428	1.462	0.246
versicolor	5.936	2.770	4.260	1.326
virginica	6.588	2.974	5.552	2.026

We can also include R code in the text.

Or we can report the mean sepal length of the Iris specimens belonging to the clade *Setosa*: 5.006.

equations:

$$E = mc^2$$
